"Most pathetic were some of the lucidents. One of the figures most noticed among the crawd of sick was that of a Capuchin friar, blind and almost stone deaf, who had been brought from far by two of his brethren in hopes of As for scenic delights the Northern obtaining a cure. These accompanied him to the piscina, all dressed in country unparalleled. In crossing the long robes of their order, the Rocky, Bitter root, and Cascade He was led down to the water. mountains, the greatest mountain scenery to be seen in the United States from car windows is found. The wonderful bad lands, wonderful in graceful form and glowing color, are a poem. Lakes Pend d'Oreille and Cœur d'Alene, are alone worthy of attention of the color of the friars, confidently, as he helped him out again. No reply. 'But surely you could hear when you were in the water?' he pursisted. Still no answer. 'And could you not green hear our voices when we prayed and Cour d'Alene, are alone worthy of a trans continental trip, while they are the fisherman's Ultima Thule. The ride along Clark's Fork of the Columbia river is a daylight dream. To cap the climar this is the only way to reach the far famed Yellowstone Park virtue for him, and he went away un-

"During my service at the piseina there appeared upon the scene M. Zola in person. He had intended preserving his incognito, but was inopportunely recognized at the station, and forth went about accompanied by a y coaches, with Baggage Express, depostal cars all drawn by power-Baldwin Locomotives, makes a train to go. He remained some time at the

piscins, watching the proceedings with a critical eye. I overheard one good detected a certain ring of admiration in his voice: 'Ah, there, indeed, is a very great sinner!' M. Zola was also taken over to the hospital, and, among others, he talked for some time to a little girl who was, I believe, said to have been cured of her al mont. The child seemed ill at ease and absent, ni the next day, returning to her, he asked her why she had been so tr uble t. 'Ah, monsieur, she replied, 'I was trouble! because all the time you were questioning me I was praying for you had be fald her on the forehe I Tall Mail Ja-

HYPNOTIO BUSGEPTIBILITY.

The differences in the clouders appear to have great influe sees a by postic sus those who have been exp set to the tropical heat are much in re easily influenced than those who live in the temperate or frigid zones. Hypnesis not only appears sooner in the tropical climates, but it is usually deeper, and the more complicated conditions of the states invariably appear immediately. The hypnotic susceptibility does not depen on these observationes alone. There are many other conditions which we must find part'y outside of the individual and partiy within. It is necessary to especia by notice the different tempers of mind, such as delight, sorrow, etc. What also works against coming into the hypnotic state is overexertion, either mentally or bodily, and Prudery is the hypocrisy of mod-empty or over-loaded stoms he excessive had before been identified among the use of certain nourishing substance fiquors, strong spices, coffee or ica. All these conditions more or less prevent or disturb the coming hyprosis. thermore, outwar! inflaences, such as temperature, dress, place of residence and surroundings, should all be consid-The room in which experiments are to be performed must neither be too

warm nor too cold. Dryness is always encouraging to hypnosis, while damp air disturbs the nfluence. Strong olor of flowers and certain perfomes are very often advantageous Strong lights are by all means unfavorable; a mild and shaded light is always favorable. The subject's seat must be as comfortable as possible; the least noise, the buzzing of a fly, the creaking of shoss, may disturb the good results in causing an involuntary concentration of thought, which tends to disturb the effects of the manipula-

Without exception there should be third person present in the room as witness to every hypnotic treatment involving unconsciousness of the subject.

MARVELS IN MINIATURE.

Tiny Masterphone of will lut Workman, ship Which re cannus. In a museum of curiosities at Salem, Mass, there is preserved a common cherry seed or stone, hollowed and fashioned like a backet. Within the ed like a backet. Within the basket are twelve tiny silver spoons, the shape and finish of which cannot be distinguished with the naked eye. Dr. Peter Oliver, who lived in England during the early part of the eighteenth century, tells of seeing a carved cherry stone which would be a wonder even in this age of fine tools and fine workman

ship.
The stone was one from a common cherry, and upon it were carred the heads of 124 papes, kings, queens, emperors, saints, etc. Small as they must necessarily have been, it is anmust necessarily have been it is announced on the authority of Prof.
Oliver that with a good glass the heads
of the popes and the kings could readily be distinguished from those of the
queens and saints by their miters and
and crowns. The gentleman who
brought this little wonder to England,
purchased it in Prussia, allowing the
original owner five thousand pounds for
his treasure. Think of it, twenty-five his treasure. Think of it, twenty-five ousand dollars for a cherry seed!-N

SCIENCE AND INDUSTRY.

"I wish I could give an adequate limpression of the scene. Within the placins—a long room containing three ground for mounting precions stones, baths and crowded with invalids, each and the finest known specimens of this under the charge of one or two attend-apts—a constant murmur of prayer London.

-According to M. Flammarion.

than the approximate height was from one to four miles, at Cape Farewell-from one to ten miles, at Spitzenburg from one-third of a mile to eighter miles. The measurements were made with theodolites. -The Lick Observatory announces

that Prof. Barnard has added a fifth satellite to the four satellites of Jupiter discovered by Galileo on January 7, 1610. It was discovered by Barnard on September 9. Its period is about 1: hours and 36 minutes. Its distance from the planet center is about 112,400 miles. It was observed by him on September 10, 10 hours, 53 minutes and 20 seconds Greenwich mean time. Its magnitude is the 13th. -The little rafts of eggs that guate

set affoat on the water are kept from sinking and from being upset from the fact that the tiny eggs have their points all upward, and they are glued to-gether so closely, that while there is open space all around the point of each egg, yet the width of these spaces ds so slight that water cannot readily pass through. You may again and again set such an egg raft, but it will right itself every time, and the upper surfawill remain dry.

-There seems to be little doubt that the number of the visible stars is really limited Most astronomers now admi that the total number of stars visible in our largest telescopes cannot much ex-ceed 100,000,000. This is, of course, a large number, but compared with an indefinite number it is really very amail. It may be proved mathemati-cally—and the demonstration is a very simple one-that were the number of stars really infinite, and equally distributed through infinite space, the whole heavens brightness of the sun.

-Though cast-iron pipes are the best for water under pressure, in a longer or shorter time they generally become incrusted, according to the quality of the water, the deposit consisting, as is familiarly understood, for the greater part of oxide of iron and carbonate of lime. Thus, of course, a thorough cleansing of these pipes is one of the most important problems in engineer ing, three principal methods being resorted to; trainely, taking out the pipes from time to time beating them, and scraping out the deposit that is loosbrushes and scrapers before the deposit gets hard; disselving the deposit with

-Hairpins are unde by automatic and very complicated machines. The coiled wire is put up in drains, and becomes straightened as it feels itself to the machine. It passes along until it reaches two cutters, which point the ends at the same time that they cut it to the length required. This piece of wire then alips ng an iron plate until it reaches slot through which it is pressed into the regular shape. The hairpins are then put into a pan and japanned, after which they are heated in an oven with a temperature o from 300 to 400 degrees There are but four American factor es The largest are in E mingham and Waterbury, Conn., the others in Phila-delphia and Brooklyn. Five ! undred dollars' worth of hairpins are annually Germany.

imported from England, France and roducts of the destructive distillation of India rubber, was discovered among the products derived by moderate heat from oil of turpentine. Isoprene car action of strong acids, as muriatic acid. Not very long ago a Dr. Tilden produced a lot of isoprene from turpentine. After it had been kept for some weeks it was found to have become thick and sirupy and to have lumps of hard elastic substance floating in it, which proved to be true rubber. This rubber said to be exactly like the natural product, and equally susceptible of valcanization. The importance of the discovery, in view of the growing scarcity of rubber can hardly be over-estimated POISON OF FEARFUL STRENGTH

Experiments Showing the Power of Vira

Dr. Arthur Stradling, writing of number of vipers which were presented to him, says: "Vipers have very large polson glands, and Lobtained the venom by allowing them to bite on a small oroelain spoon made on purpose, overed over with oiled slik like a drum. The fangs, sinking through the silk into the hollow of the spoon, would each discharge a tiny drop or globule of virus, and this I would collect and store in fine glass tubes or on dried Not-ting paper. "There are many other natives procure cubra venom by indus-ing the enraged reptiles to strike at a Of course this was a slow process, and not? Bal you over see a mouth that reone day I made a calculation that if my sixteen vipers had kept in full health and vigor, and had yielded daily all the year round, and supposing that it had been possible to keep the fluid without tended for me? Bean-"No, I know it betting it does not be supposed to the control of the cont been possible to keep the fluid without bended for me?" Bess-"No, I know it letting it dry up, it would have taken was not, for she said, 'A word to the letting it dry up, it would have taken more than seven years to produce a quart. This will give you some idea of the fearfdi strength of the stuff, when you think how minute is the quantity injected at each bite. The experiments which I was making just then consisted chiefly of soaking scraps of meat, bit of hard-boiled egg and things of that sort in the poison, and adalyzing the changes which resulted in them after a given interval. And from these and from similar trials it was found that — Waiter—"Er—it's customary here given interval. And from these and from similar trials it was found that venom is to abl in the digestion of the serpent's food. Of course is might de that and serve as ammunition to kill the prey as well."—Manchester Times bolder to the milkman, with whom he had been having a long discussion, "but your arguments are very unlike your milk—they won't hold water."—

Turkish humor is of a somewhat lumdrinks for each meal, acceptable to the bering awkward type, indeed it rather as a part of two meals in the day as he fanciful to a delightful degree—but who we for quently seen in Europe, and the shall say it is not quite appropriately problem is half solved. It may be confitted to the stolld character of the Mosanded after comparing authors or lempopulations of Asia Minor, and all the subject, that although ecotee ware of a piece with that glamour of dreamy mosierately of Anatolia and along the lovely shores

PUNISHMENTS IN MOROCO.

A Moorish law court is a parody of all that Europeans mean by justice. Exter tion is the main object of the judges Chicory is considered here only as ar and the contampt for suffering is abso-adulterant, whereas in Europe a lute. The rich may escape with whole skins, but those without "palm oil" have scant mercy. For instance, th mere secusation of a paltry theft, if made from some favored quarter, will bring on the accused the ordinary pun-ishment for such conduct. This conalsts in breaking the ankle bones and Cincinnati, Lexington, Louis pitching the sufferer into the nearest lane or ditch, whence his relatives may it very fine and put it into a bag made or may not remove him. As there are of woven stuff, a white stocking tor no surgeons and no medical appliances, the bones cannot be set and reunite in your coffee pot as hot as you car without burning. Pour on boiling water and keep it hot and close covered for fifteen or twenty minutes. Boiling poor creatures—possibly quite innocent poor creatures—possibly quite innocent of the offense attributed to him—hob bling over the cobbled alleys, while the passers by nudged each other and muttored "Thiaf."

In the prisons men and women chained together night and day under every circumstance of indescribable fifthand horror, wait until their friends, who bring them all the food they get are able or willing to offer a bribe sufficient for their release. I might go or with many details, but I merely want to indicate the one paramount fact of the absence of all system, principle, order, or responsibility among the so called government officials who sell justice or inj tice in the name of Muley Hassan, an who are sure to find favor in his eyes so long as they keep the cheri-fian coffers well filled.—Nineteenth Chatters

It is easier to be a lover than a hus band, for the same reason that it is more difficult to be witty every day than now and theu .- Balzac.

By the ancient Greeks, who were probly the most imaginative people of their time, finger riags were brought into use as gifts of leve and takens of betrathal. Primities nations lavishly displayed these ereaments, but little escretizes was attached to them until the Greeks, noted for their sentiment ality, saw in the circular bands and blems of eternity, and began to regard morning you are at your destination.

versal motto of the east, for things both grave and gay.

The Turkish intel igence rarely scin-

gleams with humor in a dullish sort of Oriental Mark Twains-perpet way. Oriental Mark Twains—perpetu-ally funny men—are rare. If you go to reside in the east you will be treated to more or less of dollery and facetion ness in the course of solema interviews with officials or men of business, but you must patiently await your time to The Turkish joke cannot be male of finished with in a hurry. It is generally of the narrative, rather than the conundram type. It requires a prefuce, and is weighted with a moral You laboriously decipher it in the Armice character, or you comfortably attle where (as often as not) the tale that

grave assembly of parters or fishermen or pediers there in gathered will be some grotesque story of the mythical Nasred din-Hoja, that good natured, blundering Moslem ecclesiastic, who "kusmet" has decreed should be the perpetual butt of all the combined ridicule of Oriental wags.

This unhistoric "Nasr-ed-din" is realized for the ground of the case of the story of the suppositions of the complete and the story of the diseases he treats in the great Believe and Charily Hospitals for several years and recognizes an easiperature of Oriental wags.

This unhistoric "Nasr-ed-din" is realized for the story of the s
